

MAGIC OF COLORS

“THE BLUE COLOR DAY”

Colors play a vital role in everyone’s life. Without colors life would be very slow and dull. Keeping this in mind, the importance of colors was explained to the tiny tots of Grade Pre – School and Pre-Primary. Blue color day was celebrated today for the little ones. They came dressed in blue color casual dresses. They were informed about the importance of blue color and were made familiar with all the things that are universally blue in color. They were further explained about the importance of water and how every drop of water is precious. Big cut outs of water drop were spray painted and thumb impression by the tiny tots with the blue color.
