

NEWS OF THE DAY

CLAY MOULDING

Playing with clay products, pinching it, rolling it and squeezing it into shapes and objects, relaxes young children. With this aim, a clay moulding activity was organized for tiny toys of Pre-School on 1st August. Clay Moulding is the best way to develop the hand-brain coordination, agility and fine motor skills. They also learn social skills like sharing and helping and at the same time develops their imagination and creativity while having fun.
