

# **NEWS OF THE DAY**

## **SCIENCE EXPERIMENT: SINK AND FLOAT**

The tiny tots of Grade Pre-School & Pre-Primary experimented on 12th September, 2018 how and why different objects float and sink when placed in water. Kids were made aware about “**sink**” as the action of an object when it becomes submerged in a liquid and “**float**” as the action of an object when it sits on the surface of a liquid.

This experiment aroused the curiosity of our little Vivians and made them understand about the concept of density and buoyancy.

## **Special Assembly on Literacy Day**

Literacy unlocks human potential and is the cornerstone of development. It leads to better health, better employment opportunities, and safer and more stable societies. Literacy day was celebrated by students of Class IV with great fervor on September 12th, 2018 through special assembly. The aim was to highlight the importance of literacy.
