

VISITOR OF THE MONTH

DOCTOR

A wonderful activity of our helper was conducted in Grade Pre School and Pre Primary. A Doctor visited the tiny tots to make them aware about doctor's duty and responsibility towards the society. The little ones were very eager to know more and more about their health. Surprisingly they left no chance of asking questions about their health. The doctor informed them about their personal hygiene and cleanliness around them. She further explained them about the importance of green vegetables and asked them to say no to the junk food. The interaction and the talk about healthy eating and healthy living were very informative. The tiny tots enjoyed the session and participated well in the question answers round.
