SCIENCE WEEK CELEBRATION

Dear Students,

We are thrilled to announce that our school will be celebrating Science Week from the 17th to 21st of July. The aim of this engaging week is to increase your scientific skills, feed your inquisitiveness, and introduce you to a diverse array of scientific phenomena through a series of fun-filled activities.

Here is a breakdown of the week:

Day 1 (17th July)	Exploration Monday (Science Show & Tell)	On this day, we invite each of you to bring an object that fascinates you. We want you to not display it but also share your understanding and the science behind it. It could be anything from a flower to any musical instrument to a mechanical device, as long as you can explain the scientific principles it illustrates. So get ready for a Science Show & Tell.
Day 2 (18th July)	Hands-On Tuesday (Science Stations)	There will be some science stations set up in the school, each filled with intriguing scientific games. Here, you have the opportunity to learn scientific concepts through engaging, hands-on activities. This will not only boost your comprehension but also make science more fun.
Day 3 (19th July)	Wonder Wednesday (DTH and What-If questions)	A unique opportunity for our senior students to 'Don The Teacher's Hat' (DTH). On this day, senior students will demonstrate a science experiment to their younger peers and explain the principles behind it. This is a great opportunity for the younger students to learn from their elders and for the seniors to exhibit their understanding. To increase the inquisitiveness of our students the teacher will take up a session on 'WHAT IF' questions which will have to be submitted a day in advance to your respective EVS / EVS A teacher. E.g.: What if the moon did not exist? What if all the water of sea and ocean changes into fresh water? What if there were no mosquitoes?

Day 4 (20th July)	Tech Thursday (Atal Tinker Labs)	<p>For Std 1-2: Fun activities giving exposure to students regarding varied latest technologies.</p> <p>For Std 3-5: On this day, we will showcase the winning science and technology projects designed by our senior students in past competitions. This will provide a platform for all students to witness the creative and innovative aspect of science and technology. It could serve as an inspiration for your own future projects.</p>
Day 5 (21st July)	Future Friday	<p>For Std 1-2: All the Vivians will be sensitized about protecting environment without which none of us would have future.</p> <p>For Std 3-5: To wrap up the week, we will hold a special session where we will discuss future career options in the field of science. This will provide you with an overview of the diverse opportunities that await you in the scientific domain, helping you understand the importance of science in your future.</p>
Day 6 (22nd July)	Showcase Saturday	Science Exhibition

Science Week will be an exciting journey, combining fun with learning, and we look forward to seeing you all actively participate. We hope this event will ignite your interest in science, fostering a lifelong passion for the subject. Remember, science is not just a subject, it's a way to understand and question the world around us.

So, let's come together to celebrate science and embark on a week full of learning, fun, and discoveries.

Warm regards,

Science Department
