Project "Shoonya Waste School"

Dear Parent,

Greetings and hope this letter finds you in good health and spirits. At Vivekanand School, we always strive to take up new challenges and projects that can make a real difference in the world. With this in mind, we are excited to announce our new mission of converting the school into a zero waste zone.

We believe that to achieve something on a global scale, we must start at the local level, which is why we are launching our project, "Shoonya Waste School." The aim of this project is to make our school a litter-free zone, and we need your assistance to achieve this goal.

We are asking for your complete cooperation in guiding our students and supporting the institution throughout this project. Our students will be trained in self-waste management practices to keep the school free from food waste, plastic waste, and paper waste generated in classrooms.

To achieve this, we request that you help us by encouraging your children to follow the given guidelines:

1. Ensure your child consumes their full meal during recess. Any leftover food, fruit peels, or aluminum foil should be carried back home in their own tiffin boxes.
2. Teach your child to tear plastic wrappers gently and in a particular way that will be taught to them to recycle the same. Other plastic items and pencil shavings should be carried back in their bags or pencil boxes.
3. Encourage your child not to tear paper from their notebooks and carry back all bits of paper along with newspapers in their own bags.
4. There will be no dustbins in the classrooms and all the waste should be taken back home in their bags, tiffin boxes, pencil boxes, or a reusable plastic box or jute bag.

The primary goal is to instill self-waste management skills among our students, starting from the school level and then gradually training them to uplift the same at the societal level. We request that you help us in making our children understand the significance of waste management, so they can become better citizens and nature caretakers of the future. We appreciate your heartfelt cooperation in incorporating environment-friendly values among our children.

Thanks and Regards,
Environment Council
