SCHOOL CHATBOT DEVELOPMENT PROJECT

An AI Innovation Initiative for Students of Classes VII–IX & XI

Dear Parents,

Namaskar!

As part of our continuous efforts to expose students to emerging technologies and provide them with meaningful hands-on learning experiences, the school is launching a School Chatbot Development Project.

The School Chatbot Development Project is an AI-based innovation initiative that will provide selected students with an opportunity to explore Artificial Intelligence and contribute towards the development of a chatbot designed to assist users by providing quick access to information and responses to frequently asked questions.

Key Highlights of the Project:

- Exposure to Artificial Intelligence and chatbot development.
- Hands-on experience in designing, developing, testing, and refining a real-world technology solution.
- Development of computational thinking, logical reasoning, problem-solving, collaboration, communication, and digital innovation skills.
- Structured training and mentorship by experts.
- Opportunity to work as part of a student development team on a live project.

Selection Process:

- Participation is open to students of Classes VII–IX & XI.

To ensure personalized guidance and meaningful participation, only a limited number of students will be selected for the project.

- Selection will be based on an interaction/interview assessing aptitude, interest, creativity, problem-solving ability, and willingness to learn, contribute, and perform.

Project Commitment:

- Project sessions will be conducted every Tuesday and Friday from 1:30 p.m. to 3:00 p.m. in the school. Selected students will be expected to attend these sessions regularly. School transport will be available on pilot routes after the completion of the session.
- Students will be expected to maintain regular attendance, active participation, and commitment towards assigned tasks and timelines.

Recognition:

Students who successfully complete the project and make meaningful contributions towards the development and deployment of the chatbot will be awarded a certificate by the school.

Parents who wish their ward to be considered for this project are requested to submit their interest through the Google Form shared below on or before 26th June, 2026.

Google Form Link:

<https://forms.gle/HzhBQ3Z1XVAedFZk6>

We encourage students who are curious, committed, and eager to create technology solutions to take advantage of this unique learning opportunity.

Warm Regards

Principal(Officiating)
